Greyhound Chromatography & Allied Chemicals

Established in 1981, Greyhound Chromatography has been supplying high quality Chromatography consumables to Research and Analysis laboratories around the world for over 40 years.

We are a leading global manufacturer and distributor of the highest quality chromatography columns, consumables, certified reference standards and materials, research chemicals, solvents, reagents and laboratory consumables available today.

About Greyhound

HPC

HPC Standards GmbH

The HPC Standards GmbH is a manufacturer and distributor of high-purity analytical standards for residue analysis. They are your competent partner in the fields of food- and environmental analysis.

Their products are tested in line with international quality requirements and meet the highest industrial standards. Our customers benefit from our proactive support team assisting you all the way from identifying your target substance to on-time delivery and beyond.

SGE/Trajan supplies a wide range of syringes, capillary columns, injection liners, HPLC columns, ETP & chromatography accessories.

- **Outstanding performance and superior qualities**
- **Expert knowledge in liquid handling has enabled SGE to design syringes for a vast variety of applications.**

Find out more

Chem Service, Inc. produces high purity standards for use as reference materials and for other laboratory purposes.

More than 95% of the standards Grade materials have a certified purity of 98.0% or greater and do not require purity corrections when preparing solutions for use with EPA, USTM, UST, and numerous other international methods. You can trust that Chem Service high purity standards are a quality product.

MACHEREY-NAGEL

Macherey-Nagel stands for innovative and creative solutions. Their products are among the world's most reliable analytical systems. They are used, for example, in industry, healthcare, biotechnology, environmental analysis and research.

Numerous patents and international certifications underscore the high quality of their products and the competence of their employees.

Learn more

The Dandy-Vice is a tool which assists in the process of routine filtration in the laboratory.

The concept of the Dandy-Vice is aimed at reducing operator pain felt in the hand when working with samples having high concentrations of solids, viscose samples or samples with high molecular weight.

More info

High Purity Standards has proudly served the scientific community for the past twenty years with high quality spectrometric standards and reference materials for AAS, ICP, ICP-MS, GC, GC-MS and IC, and has now expanded their stocked reference materials to include ISO guide 34 multi-component organic reference materials.

3M™ are a science-based technology company that is committed to improving lives and doing business the right way. They love applying science to creating products that, in big ways and small, make things better in some way.

Helping people to be safe. Making them more productive. Protecting their health. Safeguarding the environment. And have an insatiable appetite for meeting the world's ever changing challenges.

Because you need quality!

Specialised in the production of high purity solvents, Biosolve supplies the pharmaceutical industry, hospital analytical laboratories and associate industries.

In addition to producing pharmaceutical, chemical, or analytical grade reagents and solvents, Biosolve can offer specialised product lines including formulations and ultra-pure solvents for custom applications, of particular importance in the pharmaceutical industry.

Thermo Fisher S C I E N T I F I C

Thermo Scientific Instruments, equipment, software, services, and consumables empower scientists to solve for complex analytical challenges in pharmaceutical, biotechnology, academic, government, environmental and industrial research, as well as the clinical laboratory.

Thermo Fisher's products address a range of needs from sample, material characterisation and chemical analysis to clinical diagnoses and biological-based therapeutics manufacturing.

KNAUER high pressure pumps are well-known for their compactness and reliability. KNAUER offers a wide selection of pumps for dosing applications. State-of-the-art (U) HPLC pumps are available for preparative and analytical applications.

Pumps for FPLC are also available. Exchangeable pump heads provide a maximum of flexibility and easy maintenance. Models with electronic compensation drive offer very low pulsation.

Paragon Scientific Ltd

Shop Now

Paragon Scientific, a trusted producer of premium quality reference materials since 1994, joined the LGC family in 2021, strengthening the global reference materials offering for both businesses through strongly complementary product portfolios.

Paragon also specialise in the production of premium quality reference materials that include Density, Flash point, Liquid Colour, Refractive Index, TAN/TBN and viscosity standards.

NIST

NIST (National Institute of Standards and Technology; U.S. Department of Commerce) is the federal technology agency that works with the industry to develop and apply technology, measurements and standards.

NIST supplies industry, academia, government, and other users with over 1200 reference materials of the highest quality and metrological value.

Peak Scientific is a leading innovator in the design, manufacture and on-going support of high performance on-site gas generators for analytical laboratories.

With nearly twenty years of experience in pioneering reliable gas generator technology, Peak scientific develops market-leading nitrogen, hydrogen and zero air systems, mainly for the fields of LC-MS and GC. An on-site gas generator from Peak Scientific is the practical and cost-effective alternative to pressurized cylinders.

Smart Healthy Caps are designed to comply with the increasing safety regulations of the modern laboratory and are manufactured from inert, chemically resistant materials, such as PTFE and polypropylene.

Smart Healthy Caps are designed to fit a complete range of bottle threads either directly or through the use of a suitable adaptor.
